EDUCATION

University of Benin

Bachelor of Engineering in Marine Engineering

Center for Maritime Studies and ICT, University of Benin

Diploma in Maritime Studies and ICT

Benin City, NG

Mar 2019 - Aug 2020

Benin City, NG

Mar 2021 - Sept 2025

TECHNICAL SKILLS

Languages: Python, Rust, C/C++, SQL (Postgres/MySQL), PHP, JavaScript, Bash

Frameworks: Django, FastAPI, Flask, Actix, Axum, Vue.js, Bootstrap

Infrastructure & Tools: Docker, Azure, AWS, GCP, Git, NGINX, Linux, JIRA

WORK EXPERIENCE

Fellowship Member (DevRel focus)

Sept 2024 - Sept 2024

Rust Foundation

Remote

- Spearheaded the adoption of Rust programming language within African universities, increasing engagement by 60% through collaborative initiatives.
- Conducted workshops and training sessions to promote Rust, resulting in an 80% increase in adoption among students and educators.
- Collaborated with university systems to integrate Rust into their curriculum, expanding the developer community.

Software Engineer

Dec 2023 - Feb 2024

Fira

Remote

- Architected and managed the backend infrastructure using Django, PostgreSQL, and Docker; improved API response time by 20% through code refactoring and query optimization.
- Developed RESTful APIs for multi-user platforms (Customers, Vendors, Admins) and implemented bulk upload features to reduce manual data entry work.
- Managed the full deployment lifecycle on Azure, ensuring high availability and scalability for web applications.

Programmer & Technical Writer (Open Source)

Jun 2023 - Nov 2023

MetaGPT

Remote

- Proposed and implemented video documentation strategies, boosting tool usage by 60%.
- Translated technical documentation (Chinese to English), significantly improving accessibility for global developers.
- Contributed to core functionality and documentation site builds using Vue and Markdown.

PROJECTS

- **Waitlist API (Django, DRF, PostgreSQL, Docker, Azure)** - Engineered a custom waitlist management API, handling secure email notifications and user tracking for new product launches. Integrated seamless database solutions across web, mobile, and desktop platforms to manage user data efficiently.
- **Bible Bot (Python, Twitter API, Meta AI, Azure)** - Built an automated Twitter bot generating daily content using Meta AI and Python, deployed on Azure/Docker for reliability. Achieved consistent daily automated posting of verses, explanations, and prayers, demonstrating strong cloud automation skills.
- **Gemini Chatbot Clone (Python, Google Gemini API, Streamlit)** - Developed a generative AI chatbot utilizing Google's Gemini API for natural language processing and coding assistance. Implemented an interactive UI with Streamlit to solve coding exercises and answer user queries in real-time.

EXTRACURRICULARS & CERTIFICATIONS

- **Postman Student Expert Leader:** Led workshops and training sessions to promote API literacy and testing skills within the student community.
- **Rust Fundamental:** Certificate from Duke University.
- **AI Text Summarizer App:** Certificate from Postman.
