SUMMARY

As an open source developer and API literacy advocate, I am passionate about promoting the adoption of Rust programming language in Africa and enhancing API skills among students. I have been working as a fellow at Rust Foundation since September 2024, where I contribute to growing Rust adoption within African universities. I also lead workshops and training sessions to teach Postman, a leading API platform, and use its resources to help people learn API skills in their communities, schools, or at official Postman events.

EXPERIENCE

Rust Foundation, Fellowship

Sep 2024 - Present

- Spearheaded the adoption of Rust programming language within African universities, fostering a collaborative environment and increasing engagement by 60%.
- Conducted workshops and training sessions to promote Rust, enhancing Rust skills among students and educators, resulting in a 80% increase in Rust adoption.
- Collaborated with university systems to integrate Rust into their curriculum, driving innovation and expanding the developer community.

Postman, Student expert leader

Nov 2023 - Oct 2024

Promote API literacy among students

Build scalable API

API testing and documentation

Lead a workshop, training session, or event to teach Postman.

Use Postman resources and recommended practices to help people learn API skills in your community, school, or at an official Postman event.

, VueJS Developer

May 2023 - Oct 2024

Make a correction to the Vue js documentation site

Link the sponsor page to the write route

Debug a typo issues on the sponsor page

Fira, Technical lead

Dec 2023 - Feb 2024

As a Technical Lead and acting CTO, I bring a strategic mindset to align technology solutions with business objectives. Skilled in leading cross-functional teams, implementing cutting-edge technologies, and optimizing processes to deliver high-quality results. My passion lies in fostering a collaborative environment that encourages continuous learning and growth.

MetaGPT, Open source contributor

Jun 2023 - Nov 2023

Building the documentation sites with others team mate

Translating Chinese into English for easy comprehension by developers who are not familiar with Chinese.

Proposing the creation of video documentation for easy user accessibility. This boosts usage by 60%.

Building and implementing the use of major functionality.

HackerNoon, Technical Writer

Jun 2022 - Aug 2023

Creating content that impact life on the web3 platform

Weekly publication

Internshala, Student Ambassador

Apr 2022 - Aug 2023

- Helped students secure internships and compete for global opportunities by creating awareness and establishing clubs for various programs.

- Organized and led workshops, training sessions, and events to teach API skills, resulting in a significant increase in student engagement and API literacy.
- Utilized resources and best practices to foster a collaborative learning environment, enhancing students' technical skills and career prospects.
